1   storing information that designates at least one unit of television or radio

2 programming required at a future time;

3   passing to said processor, controller, or computer some information stored at a

4 specific portion of said storage device;

5   processing said passed information to identify some television or radio

6 programming stored at said device;

7   comparing the identification of any identified programming to said stored

8 information that designates at least one unit of required television or radio

9 programming, thereby to enable said station to locate or identify a portion of said

10 storage device that does not contain television or radio programming required at a

11 future time.

IN THE SPECIFICATION

On page 1, please rewrite the paragraph in the "Cross-Reference to Related

Applications" as follows:

This is a continuation of application serial no. 08/113,329, filed August 30, 1993,

herein incorporated by reference in its entirety, which is a continuation of application

serial no. 056,501, filed May 3, 1993, now U.S. Patent 5,335,277, which was a

continuation of application serial no. 849,226, filed March 10, 1992, now U.S. Patent No.

5,233,654, which was a continuation of application serial no. 588,126, filed Sept. 25, 1990,

now U.S. Patent No. 5,109,414, which was a continuation of application serial no.

096,096, filed Sept. 11, 1987, now U.S. Patent No. 4,965,825, which was a continuation-

in-part of application serial no. 829,531, filed Feb. 14, 1986, now U.S. Patent No.
